CYBER SECURITY PRODUCT REVIEWS:

GARTNER PEER INSIGHTS

Sponsored by Cyber Talk

What Customers Say About Check Point Solutions

Peer reviews represent a contemporary approach to selecting enterprise software, as they present hundreds or thousands of data points quickly. Analyst reviews can take 6 months to a year, and only represent a single perspective.

In this solutions brief, we present you with products to assess, high-level product overviews, and informative peer insights from Gartner. Reviewers and their content are screened for authenticity and technology providers are not permitted to contribute reviews. You can remain confident that what these experts have to say is the real deal.

Next Generation Firewalls

Next generation firewalls (NGFWs) are the cornerstones of modern cyber security, but selecting the right next generation firewall can be tough. In the last 12 months, 95% of Gartner's reviewers who evaluated Check Point's NGFW gave it 4-5 stars.

> " The Check Point Next Generation Firewall is like Apple in the world of Firewall and Security... Easy initial installation and integration + Easy day-to-day management + Logging and reporting."

Get a next generation firewall that you can customize, and that has outstanding features and ratings. You can compare NGFW ratings right here:

CHECK POINT	CISCO	PALO ALTO NETWORKS	JUNIPER NETWORKS	FORCEPOINT
Next Generation Firewall	ASA	VM Series	SRX Series	Forcepoint NGFW
★★★★★	★★★★★	★★★★★	★★★★★	★★★★★
4.6	4.5	4.5	4.4	4.0

"CheckPoint Next Gen FW, the best way to protect a corporation against the latest threats" says an infrastructure and operations employee. "An excellent player in the security perimeter," says an analyst.

At the end of the day, the choice is yours, and you'll want to choose Check Point. Learn more.

Network Cloud Security

Easily extend security across both public and hybrid cloud environments with a single pane of glass management solution. Effortlessly peer into public cloud networks, applications and threats, and take advantage of the ability to import and use cloud instances in policy and logs.

When it comes to unified security management, cloud integration policies, cloud integration logs, threat prevention and sandboxing, deployment templates, and scalable licensing, you'll again want to choose Check Point.

Here's what customers say about it:

"Check Point The Bentley Of The Security Industry"

Submitted: June 24, 2020

★★★★★ **Overall User Rating**   **Was this user review helpful?** 👍 👎

Product(s): CloudGuard IaaS

Overall Comment: "I have been working with the Check Point products for some years now. I am pretty comfortable with the experienced receive from the vendor. I believe the vendor can do more or be more aggressive with their marketing campaigns or strategy."

See Check Point's Gartner Peer Insights rating:

CHECK POINT	BARRACUDA	FORTINET
CloudGuard IaaS	CloudGen Firewall	Fortigate: Next Generation Firewall
★★★★★	★★★★★	★★★★★
4.8	4.7	4.7

The choice is easy. Learn more.

PROTECTED

SandBlast Network

When it comes to network security, your organization should strive to defend against the most evasive threats, and to protect against targeted attacks. What programs are you currently running to prevent sophisticated zero-day threats from slipping through your system?

Keeping both networks and users safe from email and web-borne threats can be a challenge, but it doesn't have to be. Invest in network security that's been proven effective via independent third-party tests, and that gets unbeatable peer ratings.

See Check Point's Gartner Peer Insights rating:

CHECK POINT	BARRACUDA	FORTINET
SandBlast Network	CloudGen Firewall	Fortigate: Next Generation Firewall
★★★★★	★★★★★	★★★★★
4.8	4.7	4.7

"I recommend Check Point, as it is a reliable, stable and safe solution. You can sleep more peacefully," says one account manager. "Check Point is undoubtedly the best vendor in cyber security solutions," says another.
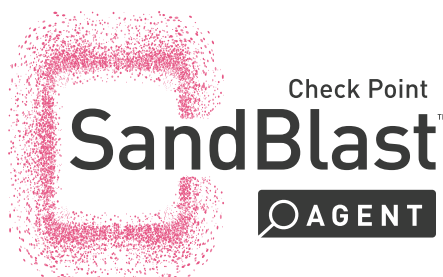

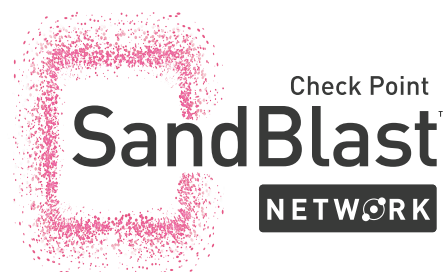

The choice is simple. SandBlast network offers the best NSS catch rate, and evasion resistance capabilities. Learn more.

SandBlast Agent

Roughly 70% of breaches begin with endpoints, which are particularly vulnerable within organizations that rely heavily on IoT devices, such as healthcare systems and financial institutions.

In the wake of stringent new GDPR laws, be sure that your organization is not only compliant, but that your organization is secure. Compliance is not a security strategy; nor is transferring the remaining risk to insurance.

Now is the time to proactively assess whether or not your sensitive client data is truly protected. Looking to invest in more optimal endpoint solutions?

See Check Point's Gartner Peer Insights rating:

CHECK POINT	PALO ALTO NETWORKS	FIREEYE
SandBlast Agent	Cortex XDR	Endpoint Security ((HX)
★★★★⯪	★★★★⯪	★★★★⯪
4.6	4.4	

"We have been using this product for more than two years, and [are] happy with the software", said one system administrator, in June of 2020. Choose Check Point's SandBlast Agent to protect your data.
